

General Caution Messages

Some people may be sensitive to various ingredients. All products are tested on willing family and friends and to date we have not had any reported concerns.

There will always be someone that will have an allergic reaction to something (i.e. my daughter is allergic to lemons, but her brothers aren't). So to make a point, we do recommend that any product you use (ours or someone else's) should be used in moderation until you are sure you are not sensitive or allergic to it. If you do develop an allergic reaction or a sensitivity to any of our products, please rinse off, discontinue use and let us know.

Our products are only intended for the purposes as described on our website and/or labels. If you use our products for any other purpose, please make sure you can, and that others will not be adversely affected i.e. pets, children or the elderly. We will take no responsibility for anyone using our products other than instructed.

Various ingredients (i.e. essential oils) used in our products should be used with care and stored in a safe place. Do not leave in an area where children or pets can have easy access to them as they do look and smell delicious and will become too tempting. Our products containing essential oils are developed for adults and not for pets, small children, elderly or frail.

Our bath products cannot be used in food or eaten.

If you are on medication or if you have a medical condition, seek medical advice from your Doctor before using.

Avoid Clary Sage, Cypress and Peppermint during pregnancy and Lavender in the first 4 months of pregnancy.

Avoid Cypress if you suffer high blood pressure or epilepsy.

Avoid Citrus oils such as Lime, Lemon, and Orange prior to sun exposure as they can cause photosensitivity.

Avoid Geranium and Ylang Ylang where concentration is required, i.e. driving and studying.

Our Colours

Colours that may be used in our products are FD&C, ultramarine, cosmetic oxides and natural powders.

Colours

Yellow CI.19140,

Orange CI.15985,

Pink CI.16185,

Red CI.16255, C.I.14720

Blue CI.42090 (CI.73015 - superseding)

Green CI.44090,

Lilac CI77007

Browns: may contain Brown Umber (cosmetic oxide)

Grey: may Black (cosmetic oxide)

Lilac Blue Natural is an Organic Purple Corn Powder, high antioxidant and anti-radical kinetics capacity. High in Anthocyaninins which encourage connective tissue regeneration and anti-inflammatory. This natural colourant has a tendency to go a greyish colour over a couple of months.

Pink Natural is Hibiscus

Yellow Natural is Curcumin

Terms we use for describing our colouring methods or shades are: Frosts, Traditional, Vivid, Mixed Shades, Natural.

Frost colours are achieved by lightly colouring our bath salts using FD&C. This is a very pale colour.

Traditional Colours are darker than the Frosts.

Vivid Colours are very dark colours that should be used with care. Not much is needed to colour bath water.

Mixed Shades are Creative Salts signature bath salt blends. Each mixed blend contains light and dark colours. They are different to the traditional singled colours used. There may be slight colour variations from mix to mix due to hand blending, but it is not noticeable.

Natural Colours are not as vibrant as the FD&C or Ultramarine colours and do not last as long either as natural colours are more sensitive to light, heat and moisture absorption in bath salts. These colours are used in our Natures Pampering range.

OUR INGREDIENTS

Lots of Fun™ | Divine Scent™ | Natures Pampering™ |
Creative Your Own Designer Blend

Our Vision...Our Future

Provide products that
Look Great
Feel Fantastic
Smell Wonderful
Priced Affordably

Our Main Ingredients

Australian Rock Salt

Pure 100% Australian salt which offers the health benefits associated with mineral springs and spas. The salts are a natural crystalline sodium chloride of high purity. Produced in Australia by natural solar evaporation of natural salt water brines, harvested and double washed.

Sodium Bicarbonate

An inorganic salt known to neutralize acids on the skin and washes away oil and perspiration. It also makes your skin feel silky smooth and it is main ingredient used in Bath Bombs and Spa Soaks.

Borax

Orris Root Powder

May be used in some products to prolong the length of fragrances.

Vitamin E Natural (D alpha tocopheryl acetate)

A natural form of stable vitamin E, derived from vegetable oils. Vitamin E acetate is a powerful antioxidant, possessing the ability to increase the moisturisation of the skin's horny layer and thereby improve surface relief.

Optiphen ND™

More Info: Optiphen ND™ is a complete preservative system is paraben free and does not contain formaldehyde releasers. It is effective against Gram-positive and Gram-negative bacteria, yeast, and mold. Optiphen ND™ is approved for use worldwide. We may use this in our creams.

Mango Nut Butter (mangifera indica)

- A tropical butter that has a similar composition to Shea and Cocoa, however the fatty acid content profile is slightly different and enhances the spectrum of natural EFAs, antioxidants and vitamins.
- Has natural emollient properties, high oxidative ability, and regenerative activity due to its high unsaponifiable.

Joboba Oil (simmondsia chinensis)

- For all skin types but is excellent for dry and mature skins and inflamed conditions. Also controls acne.
- Closely resembles skin sebum, making it an excellent moisturizer

- Gently unclogs the pores and lifts grime and imbedded impurities.
- Contains myristic acid which also has anti-inflammatory actions.
- An antioxidant.

Apricot Kernel (prunus armeniaca - Australia)

- For dehydrated, delicate, mature and sensitive skin as it is moisturizing, nourishing and revitalizing
- Helps to sooth inflammation
- Rich in both oleic acid and linoleic acid.
- High in poly-unsaturated fatty acids, that is specifically beneficial for facial massage.

Grape Seed Oil (vitis vinifera)

- For acne and other skin complaints.
- Mildly astringent qualities which help tighten and tone the skin.
- Rich in linoleic acid, an essential fatty acid important for the skin and the cell membranes.
- A preferred cosmetic ingredient possessing regenerative and restructuring qualities which allow a better control of skin moisturization.
- Contains more linoleic acid than many other carrier oils.
